

Why contract Coding?

- Contract Coding provides a solution to skilled coder shortages.
- Contract coding offers a cost-effective investment based statistically on the hourly coding throughput we are able to achieve.
- Our contract coding team is highly skilled with a lot of coding experience. This experience gives an advantage and edge in terms of both coding output and accuracy.

Code-Supreme

Code-Supreme is a service offering facilities to those who are wishing to reduce their outstanding coding faster and over a short period of time.

We understand how frustrating it can be to see those coding shelves overflowing and retarding your cash flow. Code-Supreme produces swift reductions in outstanding coding by applying a concentrated effort over a shorter period of time.

Whether you're a metropolitan, regional, interstate or even internationally based facility we can arrange an individual or a team of contract coding consultants to code out your backlog during or after hours. No need to wait weeks to see an improvement, come back to empty coding shelves after a weekend.

Contact us to coordinate a Code-Supreme for you

Emergency Medicine Services (EMS)

To avoid lack of facilities and services on emergency cases.

Consultancy for Hospital setup

For National or International locations. We have strong team and intelligent professional to provide the best services and solution for your requirement before and after the completion of project

FAQS

FAQ (Frequently asked question)

What does a medical coder do?

Medical Coders work for insurance companies and health care organizations. Every time a healthcare provider renders services to a patient (this is called an encounter) a claim is filed to the patient's insurance provider. For all the types of encounters, there exists a specific code for each. these codes tells the payer what was wrong with the patient and what services were performed. The job of the medical coder then is to take bills submitted to the insurance company and translate them into the appropriate codes. This may seem easy, but there are a lot of codes and procedures to learn, along with basic medical terminology.

How much money do medical coders make?

This will range depending on your experience and the nature of work you are doing. A medical coder can make upwards of \$40,000 working from home as an independent contractor after a few years of experience, while coders running their own coding firm can earn over \$100,000 a year. There are many cases of these happening.

What kind of education is required to become a coder?

Much like medical transcription and medical billing, you will need to learn a great deal of codes and procedures to be able to handle a job. There is also basic medical terminology, which is also often included in coding courses.

What kind of skills are needed to become a successful medical coder?

If you have past experience in data entry, computer or secretarial work, you probably already have most of the skills required. A brief summary of the skills required:

Typing skills.
Reading and listening skills
Ability to work alone without supervision
Good computer skills

What is the difference between medical coding and medical billing?

Medical billers work for medical practices, preparing bills for services rendered. These bills or invoices are then sent to insurance companies. Coders on the other hand, work for hospital in patient coding ,work for the insurance companies, taking bills submitted to the insurance company and translating them into the appropriate codes. They are similar professions and both require medical terminology.

Whom will I be working for?

Medical Coding/Billing Specialists work Medical BPOs.

How much work is available?

The U.S. Department of Labor estimates that the demand will increase much faster than average.

What is the potential for advancement?

As a Medical Coding Specialist, your earnings grow with your experience.

How long does it take to finish the medical coding and billing program?

The length of the medical coding and billing program varies depending on how much time you want to commit to your studies. You can finish in as little as 45 days or take as long as 3 months – it's up to you!

How do I become certified? Is certification required for my career?

Certification is not required to get a job as a medical coder and biller, but it will give your career an advantage. It provides you with medical coding and billing course credentials – something that is highly valued in today's medical field. Having the distinction of being “certified” can lead to better job opportunities and help you create the long-term career you want.

What is medical coding?

Medical Coding is converting diagnosis, diseases, Sign ,Symptoms ,abnormal finding, External Cause of injury into CODE
 Medical Coders play an important role in the financial success of private medical practices and other health care facilities. The greater the expertise of the Medical Coder in identifying relevant diagnoses for patient encounters, the greater the insurance reimbursement to the physician. This field generates medical coders who specialize in coding after a thorough training program and a certification process. The American academy of professional coders (www.aapc.com) and American Health Information Management Association (www.ahima.org) offers certification.

Medical Coding Industry has met the cutting edge of information technology due to which there has been several channels opened towards placements in the health information field. These open doors has diversified and created platforms for the aspiring generation who have laid their career in the health information field.

Certified Medical Coders are in high demand throughout the healthcare industry. In fact, according to the US Bureau of Labor Statistics, Health care is the largest U.S. industry, making this career a sound choice and medical support professionals, including Medical Coders, are one of the 10 fastest-growing allied health occupations, And, studies show that Medical Coders are paid accordingly for their exceptional medical coding skills.

As a coding and billing specialist, you will work with Medical BPOs.

The **Solution** to
Skilled Coder Shortages

International Centre for Medical Coding and Research (ICMCR) is a rapidly growing medical research and coding institute registered in India. ICMCR is engaged in providing quality services for Health care, Health Insurance and Life sciences companies in the field of medical coding, data analysis and interpretation.

ICMCR was established in 2010 with aim to impart quality training, consulting services for professionals from Health care, Health insurance and Life sciences industries. We are committed to the task of meeting the ever increasing demand for highly skilled contract coders due to acute shortage of experienced coders in the health industry.

These shortages impact on health information concerns such as revenue generation based on coded data, coded data quality, timeliness of data for clinical costing, research and indicators, and allocation of time to quality activities affecting various government accreditation likes of NABH etc.

ICMCR's aim is to provide a professional, quality service by contracting highly experienced and skilled contract coders for short or long term periods.

All it takes is an email to info@icmcr.co.in stating your site location and service requirements and we will happily coordinate the requirements.
